Check the Spaceforce Constellations review at [SpacesimCentral](#)

"I am still playing it because it is fun and has some tough battles and you really have to think about your strategy and learn the enemy ships to be successful. I have always liked the SpaceForce titles from Dreamatrix and hopefully they will keep on pumping them out and supporting them. I would give Constellations a 80% it performs well it just needs a bit more polish to be a complete game."
